

09:29 - start meeting

Chair - Eva

Minutes - Koen

---

Thursday we will be attending the seminar. Niccolò will explain the background to us that morning. Eva is not able to make it, she has to go to the hospital. The discussion has shifted to themes for our presentation, Eva brought up the idea of inserting pictures of our analyzed plants to create a green theme. Bringing the plants with us for the presentation is a possibility too. We also discussed what we should make for the Manim animation. Jasmijn had the suggestion to animate an Excitation Energy Transfer funnel. We will await the lecture on Manim tomorrow morning to get a feeling for how difficult that would be. We have looked at some example posters that have been posted on Canvas, to get inspiration of how one should look like that meets all the requirements. Mads said that we could grab some insightful pictures from the papers that we read, because those are of a really high quality. Eva said we can make a mindmap about the animation, so we are all on the same page of what we are going to make. We have discussed the creation of a Whatsapp group with Niccolò, for short questions or quick discussions about the timetable.
