

09:21- start meeting

Chair - Koen

Minutes - Koen

---

No one has really worked on video production before, besides simple school projects. Koen makes edits from gameplay of him and his friends. This can be useful in the making of the Manim animation. Mads says he doesn't really have creative skills like drawing or photography. Jasmijn has experience drawing and painting. Koen's preferred style to watch are game edits, which makes sense as he makes them himself too. Jasmijn likes to watch sped up videos of drawing processes. Mads says, to really get a feeling for which style we like, we can watch old animations of previous students.
